

Product Guide

About the Product Range

The LawrieCo product range has been developed to offer high quality and balanced nutritional options in liquid and solid formats. The various nutrition components are complemented with chelating agents and bio-stimulants designed to maximise nutrient efficiency, production outcomes and promote ongoing soil fertility.

The product range is relevant to many types of agricultural production. LawrieCo field consultants and distributors offer crop specific agronomic programs based on nutrient balance, soil and plant analysis and various other crop specific requirements.

Prescription Nutrition & Fertiliser

LawrieCo's field consultants and distribution partners utilise independent soil and plant analysis through Australian Perry Agricultural Laboratory to assess nutrient levels and mineral balance.

These are an important agronomic tool for making specific fertiliser recommendations and monitoring ongoing requirements.

Prescription liquid fertiliser & Solid blends available

Due to varying crop requirements for nutrition, we offer prescription fertiliser options. LawrieCo's production facilities and chemist provide prescription blend services to meet unique liquid and solid fertiliser requirements.

Testing, yield and crop removal data will allow us to provide a complete nutritional package for your farm.

About the NutriMAX Range

High analysis fertilisers with an NPK focus; balanced with various macro-nutrients and trace elements. Humic, fulvic and bio-stimulants ensure nutrient efficiency. Use where macro-nutrients are required to maximise production.

SURECROP

Nutrient + Bio Seed Treatments

SureCROP Product Range

Seed Treatments	Description	Typical Analysis %
SureCROP VAM™	<i>Mycorrhizal fungi, balanced nutrition, growth hormones, amino acids, trace elements and bio-stimulation</i>	N P K S Ca Mg Si Zn Mn Cu B Fe Mo Co
		1.7 0.6 4.2 0.8
		+ VAM, Bio-stimulants
SureCROP ZINC	<i>20% Zinc with the balance of phosphorous, calcium, bio-stimulants and beneficial microbes</i>	N P K S Ca Mg Si Zn Mn Cu B Fe Mo Co
		1.7 0.6 4.2 20
		+ B.Sub, Trichoderma, Bio-stimulants

About the SureCROP Range

The range of seed treatments delivers nutrition, bio-stimulants and beneficial micro-organisms direct to the seed. Key production benefits include early seedling vigour and increased nutrient availability. Increase root mass, produce stronger, healthier, more drought tolerant and productive crops.

HUMICOAT

Improve Fertiliser Efficiency

HumiCOAT Product Range

Liquids	Description	Typical Analysis %
HumiCOAT	<i>Delivers humic, fulvic and plant hormones to each and every granule to maximise fertiliser efficiency. Reduce nutrient lock up and leaching to ensure maximum yields.</i>	Humic, Fulvic, Kelp, Plant hormones + Bio-stimulants

HUMIPLEX

Complexed Trace Elements

About the BioMAX Range

A range of high quality bio-stimulants including kelp, fish, humic acid, fulvic acid and amino acids. As part of a fertiliser program bio-stimulants are beneficial to crop production and soil fertility through stimulation of natural plant and biological processes (e.g. growth, resistance to adverse conditions, nutrient cycling) in addition to improved nutrient efficiency. Bio-Stimulants also play a vital role in releasing tied up nutrition from the soil.

About the Animal Health Range

The range has a balanced nutrition approach to stock health, combined with the promotion of optimal rumen function and biota with the inclusion of humic and fulvic acids. Ideal for condition improvement and feed and pasture utilisation.

About LawrieCo

LawrieCo are Australian manufacturers of solid and liquid fertilisers. We are leaders in plant nutrition, working with farmers, distributors and advisors to incorporate balanced nutrition and biology into conventional and biological farming systems.

Complete nutritional packages are provided based on comprehensive testing and crop production data (yield and nutrient removal). Consideration of the physical, chemical and biological aspects of your soil and plant is essential to maximise production and profitability.

LawrieCo field consultants provide agronomic advice and nutritional planning to farmers and distribution partners across a range of industries including: broadacre cropping, pasture, dairy, horticulture, viticulture, tree crops, turf and landscape.

We undertake ongoing research and development in advanced fertiliser and nutrient technology with a number of research partners.

The Vision

Healthy Soil Healthy People

LawrieCo's agronomic advice and product range improve soil, plant and animal health whilst working towards long term sustainability.

We introduce balanced nutrition and biology with the aim of improving soil fertility, productivity, quality of produce and profitability.

The vision is 'Healthy soils produce balanced, nutritious foods and healthy people'.
