LawrieCo's Seeding Program

✓ Cut Fertiliser Rates 30-70%

"When adequate humic substances are present within the soil, requirements for N-P-K soluble fertiliser applications to maintain crop yields is reduced." Pettit 2007

with BioLogic SolubleHumate Granules

Quality source of 70% soluble humic acid
Mix 5-10 kg/ha with reduced fertiliser rate

✓ Tap into 'Locked-Up' P

"For plants to directly access the P 'super fund' in your soil they need to be colonised by beneficial mycorrhizal fungi (VAM)." GRDC 2003

with BioLogic SureCrop VAM Seed Dressing

VAM plus calcium, phosphorus, potassium, zinc, trace elements, amino acids, natural growth hormones and enzymes.

Application is based on Seeding Rate:

< 60kg/ha seed 12 L/T of seed
60-120kg/ha seed 10 L/T of seed
> 120kg/ha seed 8 L/T of seed
